Specialty Bollards

LIGHTED BOLLARDS

Lighted bollards are ideal to line a walkway or parking area where there is heavy pedestrian traffic at night. Lighted bollards can be used in parking lots, exterior accents or along sidewalks. They are manufactured from #304 stainless steel.

CAMERA BOLLARDS

Camera bollards are designed to house a camera or other security devices or sensors. These are manufactured to specifications for CCTV integration in either stainless steel or carbon steel. Powder coat available in a variety of colors. The camera bollard can be either fixed/embedded or baseplate mounted.

UTILITY BOLLARDS

Water and electrical outlets are utilized in the most commonly constructed, but the shape, structure, and locking door can be adapted as a secure housing for any application your site might require. The utility bollard can be either fixed/embedded or baseplate mounted. Manufactured in carbon or stainless steel, or choose from a variety of powder coat finishes.

CUSTOM BOLLARDS

Custom-designed bollards can be developed in a myriad of site-specific designed shapes and uses, based on your needs. Let our design and production team turn your idea into reality.
